# What do the People want?

## Opinions, moods and preferences of European citizens

The Eurozone crisis has pushed reforms of the European Union to the forefront of the political debate. How can a union of 28 states with a population of over half a billion be reformed to further future economic crises and political challenges? Finding an answer to this question is extremely difficult not only because current reform proposals are so varied, but even more so because we lack insights into the preferences for reforms amongst national elites and publics.
