Now available in English: [Monitoring Early Childhood Education Systems](#)

There is big international interest in the German ECEC systems. Up to now it has been difficult to impart the system and its developments because of the federal structure of the 16 states (Länder) within Germany. Nevertheless, constant international demands led to the decision to translate the Länderreport 2013. The publication “State by State: Monitoring Early Childhood Education Systems” delivers up-to-date facts and figures on “Access”, “Investments” and “Quality”.
