**Extended population register information for a non-profit event of the *political sponsor* in cooperation with the *organizing body***

Dear Madam, dear Sir,

The *organizing body* is a non-profit foundation whose purpose is to make a contribution to social reform. As part of *the project*, we develop innovative dialogical participation formats for the EU and implement them together with *partners*. Citizens should be given more and better opportunities to participate in European politics.

In order to test these participation formats in practice, the *organizing body* is currently conducting cross-language, cross-border and cross-cultural Citizens' Dialogues involving people from different EU Member States. The *political sponsor*, together with the *organizing body*, invites to the next Citizens' Dialogue in *the town* on **Month Day, Year**. xxx citizens from *Country A*, *Country B* and *Country C* are invited to discuss their visions for the *subject* with politicians.

Since it is important to us to invite participants who reflect a representative cross-section of the population from Country A, Country B and Country C, we have commissioned the *service provider* to assemble the group of participants.

Due to the proven method of telephone recruitment, the "smartphone generation" in particular is becoming increasingly difficult to reach. We would therefore like to recruit younger participants in particular via an extended population register information. *The service provider* will shortly be contacting you with a request for such a "register sample", which contains information on the size and socio-demographic composition of the sample. We ask for your help and thank you in advance for your support.

Yours sincerely
